FLEXIMARKERS: CABLE ROUTE MARKERS

Image shown for illustration purposes only.

CABLE ROUTE MARKERS

These highly visible and durable marker posts are designed to display a wide range of information, warnings, instructions, and identification details. Suitable for use across highways, utilities, construction sites, renewable energy projects, industrial facilities, and many other applications, they provide a clear and effective way to communicate important site information.

The large display faces can accommodate bespoke information panels featuring text, symbols, contact details, identification numbers, safety messages, directional information, and hazard warnings. Panels can be fitted to one or both sides of the post and produced to suit virtually any requirement.

TYPICAL APPLICATIONS INCLUDE:

- Underground and overhead utility identification
- Cable and pipeline route marking
- Warning and hazard signage
- “No Dig” zones and restricted areas
- Emergency and contact information
- Asset identification and numbering
- Site-specific operational and safety instructions

Whether used for utility marking, hazard identification, asset management, or general site information, these versatile posts can be tailored to meet the needs of virtually any application.

FEATURES:

- Manufactured from durable black Fleximarker material for long-term outdoor performance.
- Standard length of 1400 mm as supplied, with custom lengths available up to 1800 mm.
- Available single or double-sided.
- Fully bespoke panel designs with custom text, numbers, logos, symbols, and warning graphics.
- Multiple information panels can be incorporated to display as much information as required.
