# A COMPLETE RANGE OF LONG, FLEXIBLE DELINEATOR MARKER POSTS

## HL LONG FLEXIMARKER POSTS

The Fleximarker HL verge post is one of the Northgate Highways range of road hazard delineators. It is a flexible hazard delineator post used for traffic calming on motorway slip roads, dual carriageways, trunk roads, car parks and other points of potential danger. The Fleximarker HL has been designed for use in hard landscaped areas.

- For use in hard landscaped areas (where standard Fleximarker for soft areas will not do)
- The socket used for fixing to hard landscape environments
- It blends in well with existing posts
- Combines outstanding flexibility with remarkable visibility
- Visible in bad weather, low light conditions and night time
- High-intensity reflectors available in red, white and amber
- Virtually maintenance free
- Outstanding spring-back mechanism
- Remarkable resistance to vandalism
- Sturdy, rust and rot-proof
- 5mm thick for a long life
- Compatible with diagram 561 of the Traffic Signs Manual, Chapter 4, 2004
- Conforms to the Traffic Signs Manual, Chapter 4, 2004 (Warning Signs)

### SPECIFICATIONS (MM)

Height Above Ground	1000
Width	105
Thickness	5
Weight	1KG
Reflectors	Available in Red/White & Amber/Yellow
Reflector Size	150x90

## INSTALLATION

1. Dig out the ground 100mm to all sides of the socket and 300mm deep. Position and support the socket until the appropriate make up materials are backfilled. Ensure no make-up materials enter the socket during this process.

2. Once set into the ground the 200mm deep socket creates a housing into which the Fleximarker blade can be installed. With the Fleximarker correctly positioned, the blade is secured with the sockets integral fixing bolt.

3. Once installed, the rear chamber is covered with the galvanised cover plate and its three bolt headed screws tightened. The socket has drainage holes in its base. If required, the cover plate can be removed, the fixing bolt slackened and a replacement blade installed.

Fleximarker posts are 1400mm high in both hard and soft landscape, with shorter versions available. The vinyls are available in a range of colour combinations.
